If you ask yourself what is Art Deco? should look around. Do you see those buildings, that house or that grid, lamp, floors or maybe that antique furniture ?? Have lines and geometric shapes representing an era.

From the 30s to the 40s this universal style accompanies us in our America and many other countries of the world and influences in all areas of art and design, in painting such as Cubism, Expressionism, Italian Futurism, with strong colors, figures Work and smoking chimneys. I also influence jewelry design, graphics, fashion and industrial design.

This style is based mainly on the geometric forms of the cube, the sphere and the straight line, besides the indispensable zigzags.

It also uses flowers, cacti, palm trees, with geometric delineations. Motifs from the pre-Hispanic cultures are used: Aztec, Mayan or Inca, and motifs inspired by the objects of the archaeological discoveries of Egypt, the tombs of Tutankhamun Mesopotamia or the African and Indian peoples.

Objects like the wristwatch, the foot fan and many furniture with designs that could not be surpassed continue vigntes
